

SYMPLA™ SYSTEMS

SYSTEM MOVING PLATFORM

Although the possibilities are endless for combining SYMPLA components to make totally custom rigs and supports, there are some basic needs that apply to the vast majority of HD/SLR videographers, so we put together a few conveniently ready-to-go SYMPLA systems.

SYMPLA SHOULDER SUPPORT SYSTEM
MVA511WK

Sympla Shoulder Support System allows support of camera equipment on your shoulder, with swivel-joint handles for perfect control and flexibility. The Shoulder Support is ideal for use with Manfrotto's new HD/SLR Remote Controls, which put camera functions at your fingertips while letting you keep a firm grip on both handles.
Kit comprises: 300 mm Rods (2), Sympla Shoulder Pad, Sympla Variable Plate, Sympla Adjustable Handles, Sympla H- Offset, Clips (2).
We recommend: Counterweight, Mattebox, Remote Controls.

SYMPLA FLEXIBLE MATTEBOX SYSTEM
MVA512WK

The multi-purpose Flexible Mattebox holds 4x4" filters and protects the lens from stray light, while also permitting fast lens changes. The included Variable Plate component, with its vertical and lateral micro-adjusters, allows easy and precise alignment of the lens with the Flexible Mattebox. Compatible with all Manfrotto Video Heads.
Kit comprises: 300 mm Rods, Sympla Flexible Mattebox, Sympla Variable Plate, Clips.
We recommend: Lens Support, Remote Controls.
